

1. Use the drilling template to mark the drilling locations on the doors.
2. Use a 5/16" bit to drill all the mounting holes.
3. Use a 1 1/4" hole saw to drill access holes where needed (refer to photos)
4. Remove plastic cover from b-pillar to reveal the access hole (behind passenger seatbelt). The seatbelt may also have to be removed.
5. Bolt the puck lock plates to the doors

## Sliding Door
