**Door Panels • Bottle Holders • Cab Center Consoles • Tool Mounts**  
**Hooks • Locks • Storage Bins • Lights • Ladder Mounts**

# Shelving

J&M Shelving Units are designed to be **extremely versatile**, enabling them to work with your every need. All of our units are made of **100% aluminum**, making them durable while remaining lightweight. All units have a top tray running the entire length of the shelving unit, allowing them to store **full length pipe**. The optional pipe tray units give you an additional compartment to carry even more full length pipe. We pride ourselves on maximizing your van's storage capacity. We use as much space as possible, allowing you to be clean, organized, and efficient. The shelves are a standard 18" deep to accommodate large divider bins while giving you sufficient room to navigate the aisle or carry large items. The **generous shelf depth** also provides significantly more space for keeping your tools off the floor and easily accessible. All end panels have a solid aluminum finish, providing **a clean, professional look** while giving you extra surface area to mount your commonly used tools. Every installation kit includes all hardware and brackets specific to your vehicle, ensuring the shelving units are mounted securely and last a lifetime of use. Storage bins, additional shelves, and dividers as well as shelving doors are available as well.

## Pipe Tray

Pipe tray shelving units are able to carry up to 4" diameter pipe and are open on the side to allow storage of shorter pieces.

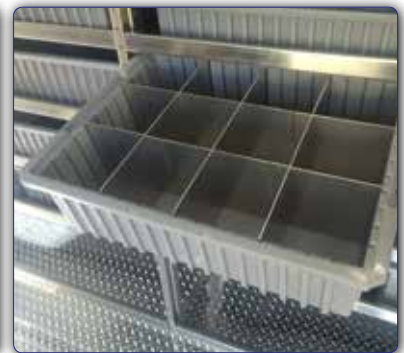

## Adjustable

Each shelf is fully adjustable even after installation of the shelving unit. They can also be mounted at a forward angle or flipped over.

## Divided Shelves

Slotted-style shelves have adjustable dividers that allow you to separate all your parts so you can quickly access them.

## Divider Bins

They are designed to work with standard divider bins, maximizing your organization and inventory. Aluminum dividers are available to replace the plastic dividers.

# Hoist

Our hoists were developed to **lift heavy equipment** in and out of your van. This drastically reduces the risk of injury and makes lifting quick and easy for those one-man jobs. We developed our hoists with safety as our main concern. Constructed of 2" heavy gauge steel tubing with multiple support gussets giving you a **350lb. lifting capacity**. The boom easily swings the load in and out of the vehicle giving you full control with very little effort. Depending on the application we offer a 30" or 36" length boom, which provides balance between the reach and the clearance through the van's opening. The hoists are engineered with a **heavy duty steel** upper mount to evenly distribute the load throughout the van body. This also reduces the hoist's footprint allowing for a very **small mounting profile** giving you that additional valuable space. The kit includes everything needed to install. The 12V system connects directly to your vehicle's battery. The hoist contains very few moving parts resulting in a durable and **easy-to-install** system. No welding or major modifications to your van are required. The hoists are available for the Sprinter, ProMaster, Ford Transit and E-series, Nissan NV, Chevy Utility Van, and Box Vans. You also have the option to **mount at any door location** you need. Our hoists can be adapted to accommodate almost any application you require. Please call for any special application requests.

## Handheld Remote

Our hoists all come standard with a handheld remote with a 9 ft. tether to keep the operator away from the payload and out of harm's way.

## Low Profile Design

Strategically mounted to be there when you need it and out of the way when you don't. Our hoists are designed to take up minimal space in your vehicle.

## Machine Hooks

We offer mounting brackets for the Spartan sewer machines to ensure a safe, stable lift. Available for the 100, 300, 1065 and 2001 sewer machines.

# Partitions

J&M Partitions are designed specifically to your vehicle and provide the best fit on the market. The nearly air-tight fit allows for **superior climate control** in the cab and greatly reduces the risk of fumes or odors from entering the cabin. It also provides ample **noise suppression**, giving you a nice quiet ride and environment to communicate. Made from 100% aluminum, our partitions are designed to keep loose tools from ever injuring the driver. Also, in the event of a break-in, it **separates the cabin from the cargo area** keeping thieves from getting to your valuable equipment. They are available in a **solid, screen, or glass window** center panel. Each provides a different set of advantages to fit your specific needs. We also offer a sliding door version with most of the same great advantages while giving you quicker access to your cargo area without being exposed to outside environment.

## 3 Variations

We offer three different center panels to best suit your needs. The solid option provides security while the screen window and glass window supply additional visibility.

## Sliding Door Option

The sliding door offers you the same great fit and gives you quick access to the cargo area without ever having to leave your vehicle. In addition, because the door slides open it does not protrude into the cargo area.

## Fully Reclined Seats

Our headboards offer unhindered seat travel for taller drivers so you don't have to sacrifice comfort for safety. They also stand upright, so there is valuable cargo space is not sacrificed.

# Flooring

J&M offers all-aluminum Flooring that **precisely fits the contour** of your vehicle. Our flooring is constructed from .100" thick aluminum Tread Brite. The **polished finish** of a diamond plate floor lends a superior look to the van interior, while the raised pattern of diamond plate offers **additional traction** in wet conditions. If you need additional mobility due to heavy, wheeled machinery, we also offer smooth aluminum flooring. Both choices are **easy to clean** and will not rust. We have designed the flooring to ensure a perfect fit to your vehicle. Our precision contouring with complete border sealing prevents dirt from collecting under the flooring making it last a lifetime of abuse.

## Replacement Floor Steps

Upgrade your plastic side step with our aluminum step. We know that additional durability on a frequently used step is important.

## Utilize Your Tie-down Mounts

Our flooring is compatible with the original tie-down mounts already present in your vehicle. By design, our flooring accounts for every one of these tie-down points with perfect precision.

## Fast and Easy Shipping

Our flooring includes everything you need to self-install. We ship the flooring in sections to lower the shipping costs. We pre-drill and countersink all holes. This keeps the mounting screws flush to preventing snagging during use.

# Door Panels

J&M door panels are designed to provide even more **tool storage**. They are available as solid panels, or with a screen window, or pre-assembled with tool mounts and trays to store your most commonly used tools. Our full door panels allow you to mount large tools that are always in the way when stored elsewhere in the van. They protect the van's interior and provide **added security** to the cargo area. Constructed of aluminum alloy, our door panels are lightweight, durable, will not rust, and are the perfect economical solution to outfitting your van's doors. The clean appearance of your upfitted doors will add to the **professional appeal** of the van, and therefore your business.

## Add tool mounts

You may add any of our tool mounts to the door panels to keep your most frequently used tools within arm's reach.

## Offered In Various Styles

Offered in three styles, each with their own advantages. The solid, screen, or tool mount options are all designed to fit your need.

## Secure your vehicle

Covering the windows of your vehicle prevents break-ins keeping both your tools and vehicle safe.

# Security Lock Mounts

J&M believes that the safety of your vehicle is important. We offer a puck lock mount for every major commercial van giving you **maximum security** for your mobile office. The lock mounts have threaded studs that bolt through the door leaving no heads of screws exposed to prevent unwanted removal of your lock. They are made from heavy-gauge stainless steel to provide unquestionable **strength and dependability**. We design our puck lock mounts to discourage any attempts at entering the vehicle. Most puck locks feature a 6-pin re-keyable cylinder making it extremely difficult to pick the lock. We offer mounting options for every door but recommend securing the cargo area at a minimum.

## Master Lock Puck Locks

Master Lock puck locks feature a steel body designed to withstand forceful attacks and is available with multiple locks keyed alike for your convenience.

## Effective Design

Our puck lock mounts are designed to have a clean, boltless face. This adds security as well as creates a smooth look.

## Add Our Puck Lock Holder

We offer a puck lock holder that can be attached to the rear door panel, shelving, or inside the driver's door to prevent misplacing them.

\* J&M Security Locks should be installed by a professional due to a higher than normal level of difficulty.

# Bottle Holders

**Safely secure your bottles** and tanks in transport with J&M Bottle Holders. By using one of our bottle holders, expect your tanks to last longer by preventing them from rolling around inside the cargo area. Keep your bottles in a safe, **easy-to-access** spot without worrying about them rolling around and the valve being broken off. Our bottle holders come with either an aluminum upper strap or with a cinching nylon strap, both designed to allow quick placement and removal of your bottles. We offer single bottle tanks as well as a refrigerant tank tower. Our refrigerant towers are designed to carry multiple 30 and 50 lb. Freon tanks to the job site. Available in multiple heights and widths to meet your needs.

## Ready to Mount

J&M Bottle holders come ready to mount to shelving, headboards, or even the body of your vehicle to ensure security.

## Bottle Holder Tower

Always keep your refrigerant stored and organized with a compact design as well as fully adjustable bottle spacing.

## Nylon Strap

We offer a bottle holder configuration to allow bottle storage inside compartments with limited space.

# Part Organizer Towers

J&M Part Organizer Towers are the best way to store your Dewalt, Milwaukee, or Stanley part organizers. **Maximize carrying capacity** with our compact, 14" deep unit that can be mounted under shelving, against the headboard, or directly to the floor of the vehicle as well as being stackable. The Part Organizer Towers also come equipped with a top tray for additional storage. Multiple sizes are available to ensure your needs are met, whether you need a **compact design** or the ability to fit a large amount of organizers.

## Compact Design

J&M Part Organizers are designed to take up as little space in your vehicle as possible by stacking organizers vertically.

## Multiple Sizes Available

We offer options to fit Dewalt, Milwaukee, and Stanley organizers in 4 or 6 bin variations.

## Solid Aluminum Frame

Protect your part organizers with a sturdy aluminum body and a spring latch designed for quick access to your parts.

Fits These Organizers	Dimensions	Qty. of Containers	SKU
Stanley	17"W x 14"D x 20"H	4	030001

Milwaukee #225046, DeWalt #DWST14825	19"W x 14.5"D x 34"H	6	030004

# Cab Organizers

J&M cab organizers are designed to utilize your cabin's otherwise wasted space. Our cab organizer is designed to be **multi-purpose** with a storage area for manuals/catalogs, rails for hanging file folders, and a top tray to store writing utensils and other items for quick accessibility. Keep all of your paperwork organized and in one spot. With the **locking lid**, you can safely secure anything valuable inside the compartment. Also included is a note holder on the front of the organizer allowing **easy access** to clipboards, notebooks, or literature.

## Multi-use Surface

A clipboard style clasp is used to prevent paperwork from sliding while in transit. Perfect for Invoices, directions, or tracking hours.

## Practical Design

The interior is designed to be used with hanging folders and includes a removable top tray for pens, keys, and business cards.

## Van-specific Base Plate

We design our base plates to fit with your vehicle's specific contour to keep the cab organizer level and at a comfortable height.

# Side Hangers & Vice Mounts

## Foldable Design

Our side hangers have a foldable design to ensure vehicle clearance while they are not in use.

## Transport Longer Pipe

Side hangers allow smaller vehicles to transport pipe that would otherwise be too long to store inside.

## Vice Mount

Complete the set with our vice mount. Designed to align with your side hangers to anchor pipe for cutting.

# Interior Skin Panels

Outfitting your van with J&M Interior Skin Panels will **protect the walls from dents and punctures**, while preventing tools from falling between the van's body panels. Our Interior Panels are constructed from **.063 thick Aluminum**. To **get the cleanest look** for your application, we offer interior panels in three different styles: smooth, diamond plate, and pre-painted white aluminum. Easily secure the panels to the walls with washer-head sheet metal screws or pop rivets through pre-located mounting holes. You can also add insulation between the panels and van for superior sound dampening and climate controls. We offer skin panels for every part of the cargo area, including ceiling and sliding doors, for most applications.

Smooth Alum.

Treadbite Alum.

White Alum.

## Complete Coverage

We offer interior panels to cover your van from top to bottom with a professional-looking smooth aluminum surface.

## Fitted to your Vehicle

Our panels are designed to offer an uncompromised fit inside your vehicle. Every bevel and contour is accounted for.

## Ceiling Panels

We offer panels to cover the ceiling as well as the walls. Paired with our diamond plate flooring, you can provide complete protection for your vehicle.

# Drawer Unit

Equip your vehicle with **unparalleled organization** by using one of our Drawer Units. Solid aluminum Drawer Units **made to handle heavy tools and heavy abuse**. Keep your tools, parts, and fittings where you know you'll find them while keeping them out of the way when they aren't needed. Our single Drawer Units are ready to be mounted to shelving, under benchtops, or any other location you need. Offered in multiple drawer configurations, you are sure to get what works for you.

## 100% Aluminum drawers

Our drawers units are made of the same material as our shelving units, door panels, and headboards to provide a consistent and professional look.

## Aluminum Dividers

Our drawer units can utilize multiple dividers. Create a perfectly organized storage solution for your parts and tools.

## Seamless Integration

Our drawer units sit flush with our shelving units to create a seamless work environment.

# Accessories

## Tool Mounts

Organize your tools where they'll always be in reach with tool mounts tailored specifically to each tool. We offer **over 30 different mounts** and have an option for every major plumbing tool. Always know when your tool is missing and prevent it from being buried inside your vehicle while being quickly accessible when you need it. Our tool mounts allow your tools to be mounted to door panels, shelving, headboards, or anywhere else you need. For a more universal application, we offer mountable trays made to carry spray bottles, cans, tape, and more.

## Hooks and Loops

Complete your outfit with any of our various hooks and loops. Our loops/tie-downs are mountable anywhere on our shelving and can be used for securing your equipment with bungee cord or ratchet straps. Prevent your hoses and cables from being tossed onto the floor with our hooks, designed to prevent kinks and damaged or lost cables. Hooks are available in clip-on and bolt-on styles. **Hooks and loops are included with the purchase of one of our Shelving Packages.**

## Shelving Doors

Protect the contents of your shelving with one of our shelving door add-ons. A lockable, solid door **protects your tools from theft as well as sharp turns**. Keep your van looking clean and secure by closing everything behind a door. Additional shelves are available if more organization is required in your vehicle. These can be ordered with your shelving unit or any

## Interior Lighting

Keep your cargo area well-lit with interior 13in LED lighting with 3-way switch. A single or double light kit option provides **ample lighting inside the cargo area** giving you the convenience you need to get the job done quickly during the night. LED lighting provides **more light while using less power** so you don't have to worry about it draining the battery while being left on. Keep your van safe and your tools visible by installing J&M lighting kits inside your vehicles cargo area.

## Divider Bins

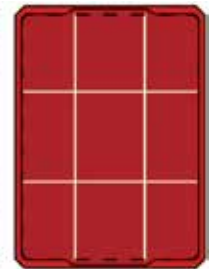

Complete your organization with the divider bins our shelving units are designed around. Available in various sizes, colors, and compartment layouts, the storage bins are perfect for organizing all of your parts where they can be easily found. We also offer our own aluminum dividers so they stay in place when filled with parts. Storage bins are the best way to keep your van organized to its fullest potential.
